

To Whom It May Concern

RE: LETTER OF REFERENCE FOR BRASTORNE TECHNOLOGY (Pty) Ltd

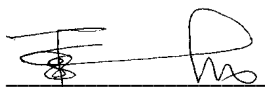

This letter serves as a reference letter by Botswana Innovation Hub First Steps Venture Centre (FSVC) for mAgri, Brastorne Technology (Pty).

FSVC is a technology entrepreneurship development programme within the Botswana Innovation Hub (BIH) which was established by the Government of Botswana to support entrepreneurship and innovation through technology transfer. FSVC identifies, develops and nurtures viable technology oriented start-up businesses similar to Brastorne Technology, with potential to grow locally and into international markets. mAgri, Brastorne Technology is a prospective member of FSVC and is still currently undergoing the Botswana Innovation Hub admission process.

Brastorne Technology is a company that provides a USSD and mobile application for farmers to market their product and services across the country. The application (mAgri) will create a platform for farmers to post their livestock that is currently for sale as well as fruits, vegetables etc. This platform will be available on smartphones as well as phones without a digital user face thus the USSD feature. Farmers will be kept connected with updates, merchants, other farmers, this with the potential to open up all markets not only in the SADC region but also globally.

Your assistance to Brastorne Technology not only contributes towards locally owned innovation and development, but also makes your organization a key supporter and component of entrepreneurship development in Botswana.

Faithfully Yours,

Mr. Tshepo Tsheko
Program Manager
